

Utility Patent Claim info

1) Name:
E Z Patch

2) Idea was invented and created on June 1,2000 by:

Blake A. Bohinc
30 Stempler Court
Holmdel, NJ 07701

and

James J. Fleck
570 N. Lake Shore Drive
Brick, NJ 08723

3) Claim info:

We claim that our invention named "E Z Patch" is the "only" one step repair patch on the market. Not only does it have a self-adhesive backing, but also has a Styrofoam plug, that is attached firmly to the backing adhesive, which is then inserted into the hole. This styrofoam plug is necessary for strength and additional support, while also being available in various sizes and shapes, with each size having the capabilities of being easily modified if necessary to fit the repaired hole precisely and quickly. It can be used for any repair in all types of construction / carpentry, including but not limited to any wall, ceiling and or floor.
